

Project Planning Phase

Project Planning (Product Backlog, Sprint Planning, Stories, Story points)

Date	12 NOVEMBER 2022
Team ID	PNT2022TMID16393
Project Name	Project – Web Phishing Detection
Maximum Marks	8 Marks

Product Backlog, Sprint Schedule and Estimation (4 Marks)

Product backlog and sprint schedule:

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	User input	USN-1	User inputs an URL in the required field to check its validation.	5	Medium	Musharraf. D
Sprint-1	Website Comparison	USN-2	Model compares the websites using Blacklist and Whitelist approach.	10	High	Rajagopal. R
Sprint-1	Storage	USN-3	Storing the Blacklisted websites in Database using IBM Cloud.	15	High	Udayakiran. M
Sprint-2	Feature Extraction	USN-4	After comparison, if none found on comparison then it extract feature using heuristic and visual similarity.	10	High	Musharraf. D
Sprint-2	Prediction	USN-5	Model predicts the URL using Machine learning algorithms such as logistic Regression, MLP.	10	Medium	Praveen Kumar. S
Sprint-2	Accuracy Test	USN-6	Selecting the best accurate model and to process further steps.	15	High	Musharraf. D
Sprint-3	Classifier	USN-7	Model sends all the output to the classifier and produces the final result.	5	Medium	Udayakiran. M
Sprint-3	Hosting	USN-8	Setting Up the Application and hosting in IBM cloud	10	Medium	Praveen Kumar. S
Sprint-4	Announcement	USN-9	Model then displays whether the website is legal site or a phishing site.	15	High	Rajagopal. R
Sprint-4	Events	USN-10	This model needs the capability of retrieving and displaying accurate result for a website.	10	High	Rajagopal. R

Project Tracker, Velocity & Burndown Chart (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6 Days	26 Oct 2022	31 Oct 2022	20	31 Oct 2022
Sprint-2	20	6 Days	1 Nov 2022	07 Nov 2022	20	08 Nov 2022
Sprint-3	20	6 Days	07 Nov 2022	10 Nov 2022	20	10 Nov 2022
Sprint-4	20	6 Days	10 Nov 2022	13 Nov 2022	20	13 Nov 2022

Velocity:

Imagine we have a 10-day sprint duration, and the velocity of the team is 20 (points per sprint). Let's calculate the team's average velocity (AV) per iteration unit (story points per day)

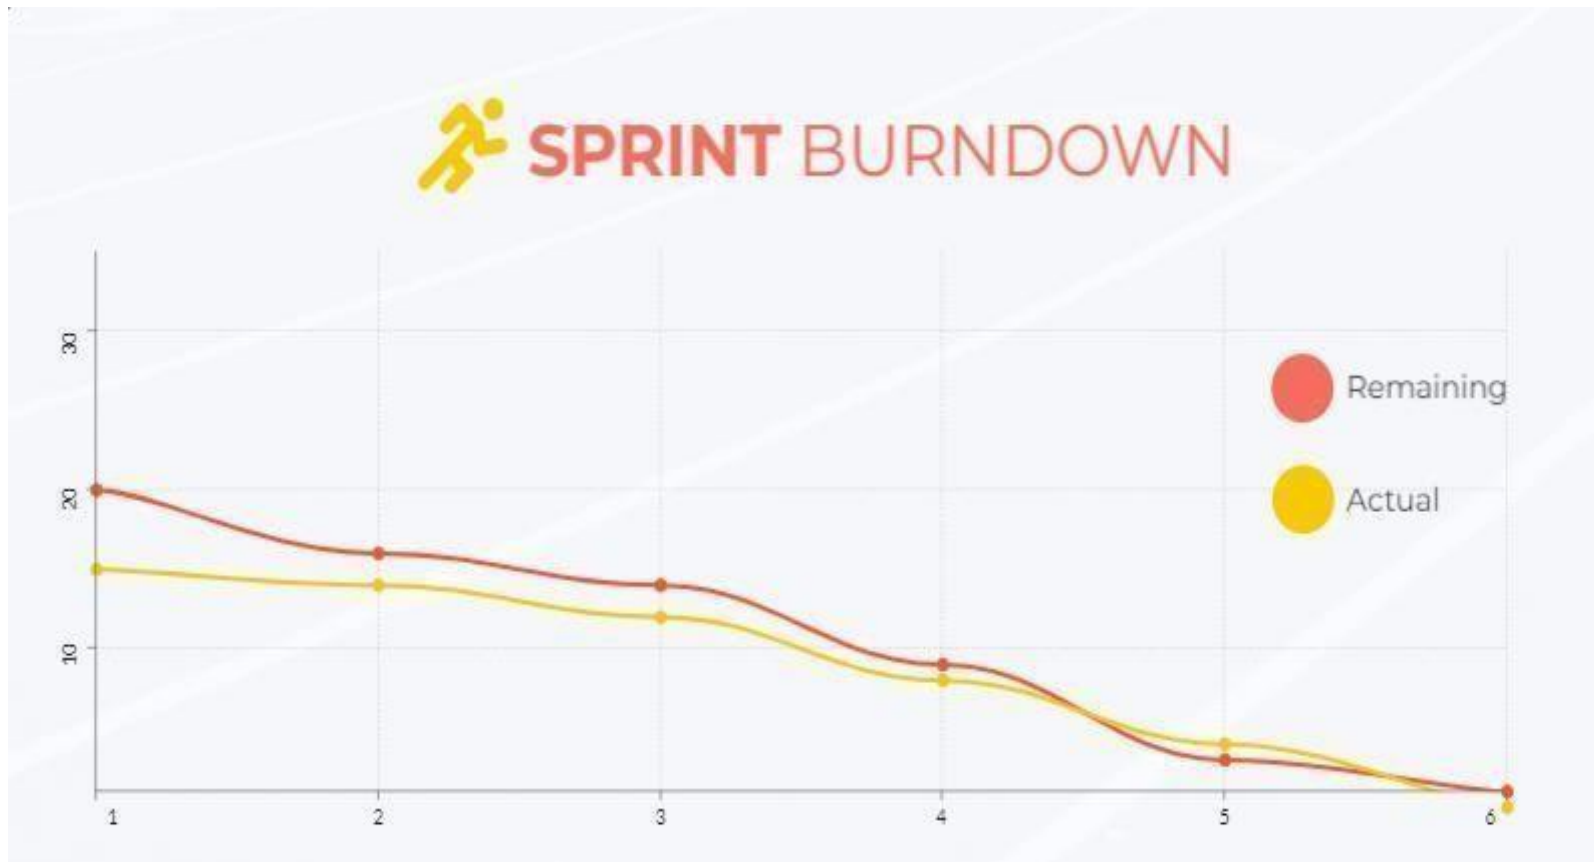

$$AV = \frac{\textit{sprint duration}}{\textit{velocity}} = \frac{20}{10} = 2$$

We have a 6-day sprint duration, and the velocity of the team is 20 (points per sprint). So our team's average velocity (AV) per iteration unit (story points per day)

$$AV = (\text{Sprint Duration} / \text{Velocity}) = 20 / 6 = 3.33$$

Burndown Chart:

A burn down chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum. However, burn down charts can be applied to any project containing measurable progress over time.
